

SOLUTION BRIEF

ALL-IN-ONE ADVANCED MANUFACTURING PACKAGE

Gain both production traceability and visibility with Arcstone's powerful suite of modules

With Arcstone's all-in-one package, leverage on our **arc.ops** advanced MES modules to gain full transparency over all your manufacturing operations. Achieve optimized production processes and collect data to continuously improve your factory floor and business systems.

ARCSTONE
arc.lite™

ARCSTONE
arc.ops™

KEY SOLUTIONS

Lightweight MES

Our lightweight **arc.lite** MES system can be rapidly deployed with plug-and-play installation to support the digitalization of manual factory processes and operations.

Integration with ERP & Third-Party Systems

Arcstone's **arc.flow** enables integration with most ERP systems (SAP, Oracle, Dynamics, etc) and other third-party systems (including other MES, LIMS, WMS, BI, CAD, etc)

Hardware Data Integration and Analysis

View daily work orders, instructions & detailed information of tasks on desktops, tablets, mobile devices in real-time. Machine, equipment and tool data is automatically collected by using the **arc.quire** data collection module

KEY MODULES

Anomaly Detection

AI driven anomaly detection engine analyses in real time. Machine learning algorithms recognizes abnormal behavior, enabling early fault detection, potential breakdowns or quality issues

Advanced Production Scheduling

Comprehensive toolset that allows users to quickly generate production runs and resource orchestration automatically from sales orders. Easily reschedule based on production needs or constraints (resources, machines, personnel or urgency)

Report Builder

Note and record facility-wide issues and problems with custom write-up forms, images, audio and video for personnel to utilize for reporting. Easily customizable and configure the KPI calculations needed.

Alarms and Alerts

Triggers configurable notifications or updates to send to management/operators when there are delays or breakdowns during the production process. Notifications can be enabled for Telegram, Whatsapp, SMS and email

Equipment Maintenance

Easily manage equipment and other tools, as well as execute preventative and predictive maintenance. Receive real-time maintenance alerts based on live machine data readings.

Dashboard Designer

Provides configurable dashboards for management to track important KPIs through a series of charts, graphs and data measures. Allows users to monitor operations at different locations and sites across the entire production line.

Advanced Checklist

Comprehensive checklist and forms system that can be flexibly designed and customized to mimic and replace paper forms and checklists at the production site. Information stored in checklists can then be accessed to trigger events or visualized in dashboards and reports.

Permissions Module

Enables manufacturers to easily attribute roles for each user that controls the tasks and actions they can perform within the system, in workflow assignments, streamlining business tasks.
