ARCSTONE

SOLUTION BRIEF

REAL TIME PRODUCTION SCHEDULING & JOB TRACKING

Maximize your productivity through increased operational visibility and efficiency

With Arcstone's solutions, gain better control over your processes with our Production Scheduler and Job Tracking modules. Build workflows, access workstation control, utilize alarms and alerts and plan your production schedules. Remote access grants full visibility over your production, with full integration with any of your existing systems.

Key Capabilities

### Advanced Production Scheduling

Comprehensive toolset that allows users to quickly generate production runs and resource orchestration automatically from sales orders. Easily reschedule based on production needs or constraints (resources, machines, personnel or urgency)

Alarms and Alerts

Triggers configurable notifications or updates to send to management/operators when there are delays or breakdowns during the production process. Notifications can be enabled for Telegram, Whatsapp, SMS and email
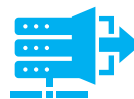

Digital Workflow Builder

Automates facility wide workflow creation and management allowing for real-time monitoring of personnel, resources and equipment. Includes the creation of daily work orders, instructions, resources, checklists, etc.
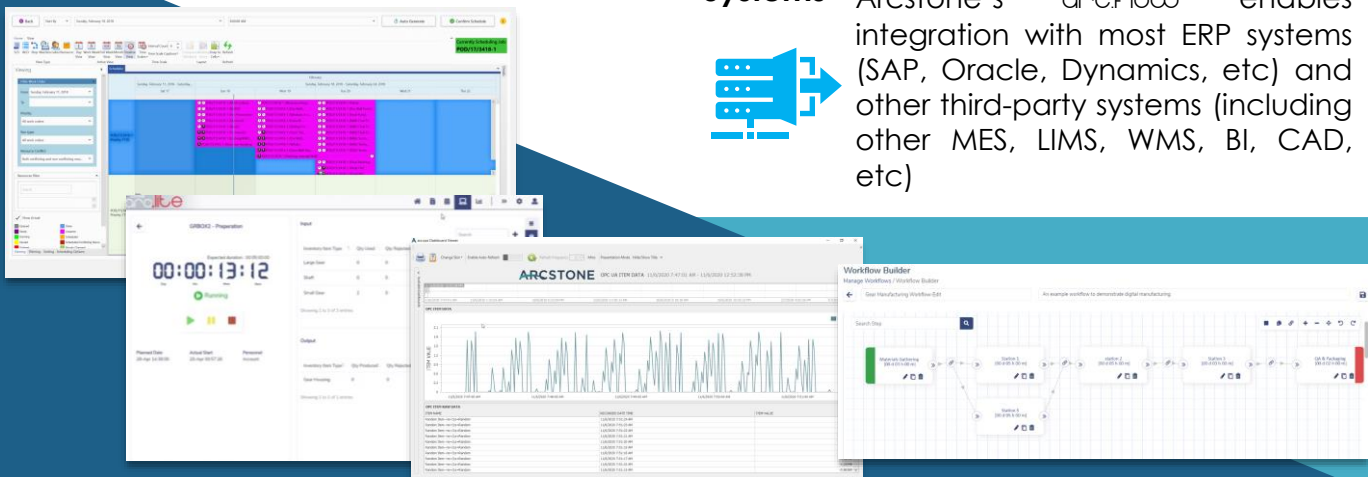

Workstation Control

View daily work orders, instructions & detailed information of tasks on desktops, tablets, mobile devices in real-time. Machine, equipment and tool data is automatically collected by using the arc.quire data collection module

Integration with ERP & Third-Party Systems

Arcstone's arc.flow enables integration with most ERP systems (SAP, Oracle, Dynamics, etc) and other third-party systems (including other MES, LIMS, WMS, BI, CAD, etc)
