

SOLUTION BRIEF

EQUIPMENT MONITORING & MANUFACTURING DATA COLLECTION

Improve your equipment maintenance and streamline your data collection processes

With Arcstone's solutions, gain real-time visibility with our Equipment Maintenance module over your machine and equipment status. Schedule recurring maintenance frequency and report on machine breakdowns to dispatch repairs. Optimize the equipment maintenance process with remote access and multiple device accessibility, configurable alarms and alerts, and custom report generation.

Key Capabilities

Equipment Maintenance

Comprehensive toolset that grants real-time machine/equipment tracking and set up recurring maintenance and frequency for equipment. Enables the reporting of breakdowns and problems, while dispatching non-scheduled repairs.

Alarms and Alerts

Triggers configurable notifications or updates to send to management/operators when there are delays or breakdowns during the production process. Notifications can be enabled for Telegram, Whatsapp, SMS and email

Workstation Control

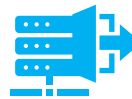

View daily work orders, instructions & detailed information of tasks on desktops, tablets, mobile devices in real-time. Machine, equipment and tool data is automatically collected by using the arc.acquire data collection module

Custom Dashboards and Reports

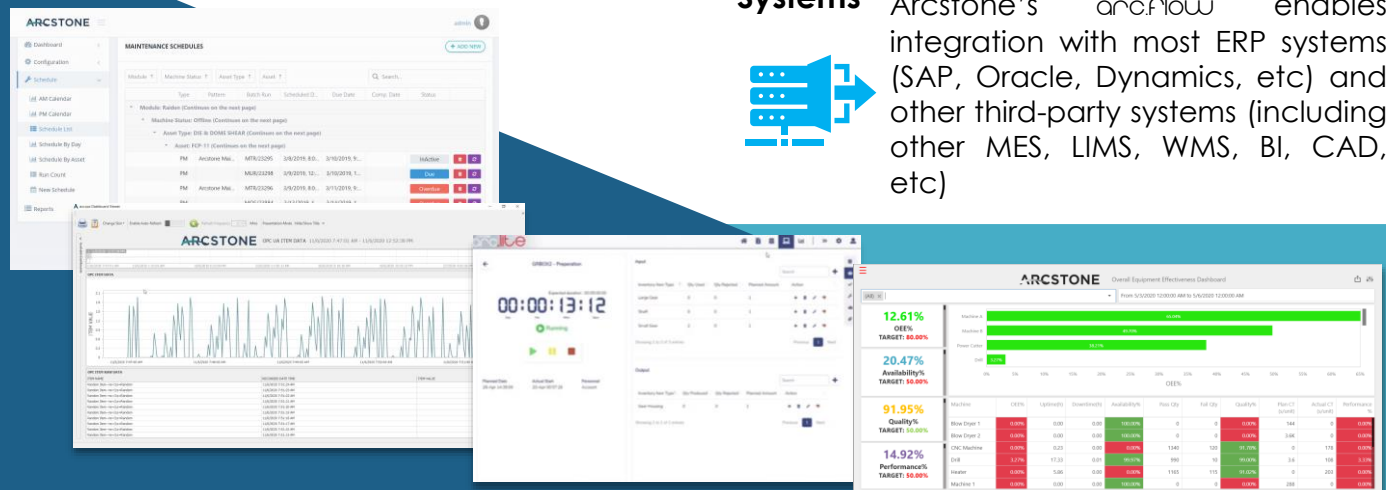

With the arc.ops Dashboard Designer and Report Builder module, users can generate custom reports and dashboards (OEE, cycle time per part, etc) to give them an overview of their equipment status & performance.

Integration with ERP & Third-Party Systems

Arcstone's arc.flow enables integration with most ERP systems (SAP, Oracle, Dynamics, etc) and other third-party systems (including other MES, LIMS, WMS, BI, CAD, etc)
